NSW - QUEENSLAND FOREST & WOOD PRODUCTS INDUSTRIES DINNER

Thursday 15 May 2025 | RSM Club Casino, NSW

This dinner has been scheduled to coincide with the Primex Expo on 15-17 May 2025. Primex has become an important destination for anyone with an interest in forestry and timber. In 2024 over 40 businesses representing the industry exhibited at the 2024 event. With the support of Timber NSW, Timber Queensland and the North East NSW Forestry Hub the plan is to make the event bigger and better in 2025. Now is the time to book a site within the forestry and timber hub at Primex and register your interest in attending the dinner at the Casino RSM.

Hurford's are looking forward to exhibiting at Primex 2025, which will build on last year's inaugural Timber and Forestry Hub. In 2025 an industry dinner on Thursday evening will provide further networking opportunities for our industry. Primex has become the largest offering of timber and forestry equipment, technology and knowledge exchange in Australia. I look forward to seeing you there!

Andrew Hurford, Chair

For A.E Gibson & Sons it was our 1st time exhibiting at Primex 2024 as part of the Forestry Hub. We found the event thoroughly enjoyable. We have been part of the Timber industry as a manufacturer of material handling equipment for five generations and are proud to work with highly capable people & companies in this vital sustainable business sector. We look forward to Primex 2025 to showcase the latest innovative, renewable and sustainable solutions to support the industry.

David Gibson, Director

Koppers Wood Products 1st exhibited at Primex in 2023 and found it to be an excellent opportunity to promote our business and showcase why hardwood timber poles are so essential for critical infrastructure. We found that last year's Timber and Forestry Hub was a pleasant improvement which brought the timber industry into a closer exhibiting group, giving the public a better opportunity to engage with us. We look forward to the 2025 event where you will find us amongst other timber friendly businesses.

Mark Hitchins, National Resource Manager
